

FOR SALE · BUILT 2020 · LATVIA

40-ft Hydroponic Container Farm

A COMPLETE NFT FARM FOR CROP RESEARCH, TEACHING AND PRODUCTION

EUR 59,000

excl. VAT · EXW Latvia · available now

40 ft HC

CONTAINER

75.6 m²

GROWING AREA

10,000 kg

MAX. WEIGHT

380 V

3-PHASE POWER

14 kW

TOTAL POWER

500 L

MIXING TANK

WHY THIS FARM

- 01 Proven.** Built in 2020 and used for commercial production until February 2025.
- 02 Tested.** Electrical circuits, airflow, HVAC and LEDs tested working in April 2026.
- 03 Ready now.** Priced below many new container farms, with no waiting time for manufacturing.
- 04 Documented.** Technical specification, CE documents, full PLC access and crop records.

HOW IT WORKS

NFT (Nutrient Film Technique): a thin film of nutrient water flows past the roots in sloped channels on six tiers and is reused. LEDs, HVAC and a PLC automate light, climate, dosing and alarms.

INCLUDED IN THE PRICE

Container and all installed equipment · approx. 30 spare grow boards · 3 spare LED panels · 2-hour handover · 8 hours of technical advice

WHAT IT IS GOOD FOR

- ✓ **Research & trials**
Light, nutrient and cultivar trials under fully controlled, repeatable conditions
- ✓ **Teaching**
A hands-on demonstration farm for universities and agricultural schools
- ✓ **AgTech testing**
Test sensors, lighting, growing media and automation in a real farm
- ✓ **Specialty production**
Herbs, microgreens, aromatic and medicinal plants for premium local sales
- ✓ **Pilot projects**
A fast start for innovation projects and pilot farms, with no build time

PROVEN CROPS

Basil · lettuce · mint · lemon balm

TERMS 30% deposit at order · 70% before collection · 90 days to collect · inspection on site or by live video · transport at cost on request
